

Close Contacts of COVID-19

School aged children (including children of primary school age) and young people who are not fully vaccinated

You are advised to isolate and take a lateral flow device (LFD) test as soon as possible.

If this is negative you can stop isolating but should continue to take daily lateral flow tests until the tenth day after the last date of contact with the positive case.

The lateral flow should ideally be taken before you leave the house for the first time each day.

If any lateral flow test is positive you should isolate immediately and book a PCR test.

If at any time- you develop symptoms, you should isolate immediately and book a PCR even if the lateral flow test is negative.
